

## Earth Ground Symbol Stamp

Earth Symbol Metal Hand Stamp is ideal for use in a variety of industries including electrical engineering to mark the point at which voltages are measured or a direct connection to the earth. This symbol is also known as the Ground (GND) symbol.

- Simply strike the stamp with a hammer to mark your component with an earth or ground (GND) symbol
- Available to buy online in 3mm, 4mm, 5mm and 6mm character heights
- Manufactured in UK with high-quality tool steel using a superior cold-forming process
- Specialist heat treated to ensure user safety and product longevity.

If you would like to order a larger size Contact Us for a quotation.

### How to Buy Symbol Stamps

Use the drop-down menu's below to select the Character Size, select a Safety Grip if required, Quantity of Hand Stamps and the Total Price will update.

Add to Basket and continue shopping or Proceed to Checkout.

### Overview

Best quality steel hand stamps made from chromium tool steel. The character is formed using a superior cold-forming process which results in the character staying sharp up to ten times longer than machined stamps.

All the stamps in this range are through hardened to between 58-62 Rockwell C and then tempered at the striking end to between 32-40 Rockwell C giving maximum safety in use

When you look at the engraved character on a standard hand stamp, the letter is a reflection /reverse of how it is indented. An example of this is shown in the image ribbon.

Manufactured under stringent BS EN ISO 9001 quality controls and exacting standards.

Safety note: As with all striking tools, we recommend the use of appropriate safety protection. Safety glasses and gloves should be worn at all times

### Our Solutions

- Traceability and Data Capture
- Automated Part Marking
- Aerospace Marking Standards
- Automotive VIN Marking
- Hand Tools for Marking and Identification
- Serial Number Marking
- Logo Marking
- Production Data Monitoring
