

## InScribe Heavy Duty Deep Pneumatic

The Deep Pneumatic Heavy Duty InScribe is a deep marking machine that creates a very deep continuous line mark. It can be integrated into existing machinery, or installed as part of a turnkey system for high volume production and identification. This high speed mark is often used in VIN marking applications.

Very deep continuous line mark

Can be integrated into existing machinery, or installed as part of a turnkey system

Often used in VIN marking applications

### Overview

The Deep Pneumatic Heavy Duty InScribe provides a much deeper mark whilst maintaining the same speed and precision of the basic InScribe model. Originally designed for VIN marking, this machine has a high power pneumatic assembly with a solid carbide tip and is ideal for heavy duty applications when clarity of information is of utmost importance. The marker supports fast cycle times with its high speed driven by a robust high-torque motor X-Y mechanism.

Very deep mark suitable for heavy duty applications

High speed and precision

Creates very clear and legible information

### Our Solutions

- Traceability Software & Data Capture
- Automated Part Marking
- Aerospace Marking Standards
- Automotive VIN Marking
- Hand Tools for Marking & Identification
- Serial Number Marking
- Logo Marking
- Production Data Monitoring
