

Column and Base Mount

Pryor's Column and Base allows handheld marking machines to be mounted securely and used as bench top marking devices.

Use handheld marking devices as benchtop machines, too

Ensure consistent quality and mark location

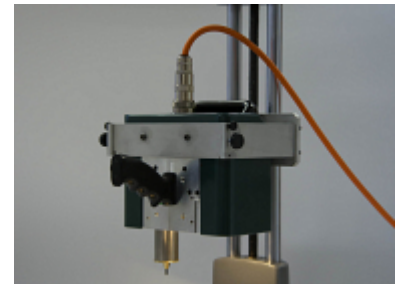

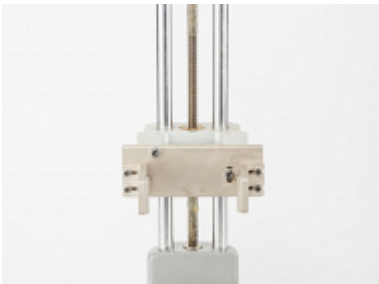

Ideal when marking many different types of part

Overview

Mounting a PortaDot machine onto a Column and Base ensures quality and consistency of both the mark created and of the mark location. Using a Column and Base provides the flexibility to use your portable marking device for marking not only large, heavy and immobile parts, but also for marking small to medium sized components, such as nameplates or labels. It is an ideal solution when marking a wide variety of parts.

Consistent mark quality, depth and location

Flexibility to mark a range of different parts with just one machine
